EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Vince Serrao on 1-24-05.

The application has been amended as follows:

Claims 18-20 are cancelled.

The following is an examiner's statement of reasons for allowance: Independent claims 1 and 17 include a cylindrical ultrasound transducer with three concentric layers being: inner electrode, piezoelectric material, and outer electrode. This is not unique as seen in Briskin (5,725,494; col. 3:32-35). *However*, the claims read that the outer electrode has spiral grooves separating the transducer into a plurality of discrete helical elements. This is to permit separate/independent operation of the helical elements. It cannot be fairly argued that this is taught or suggested by Briskin or related prior art. The claimed invention is best illustrated in Applicant's figure 4a.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Drawings

Formal drawings are now required. Handwritten arrows and numerals are not permitted.
